Election/Restrictions

- 1) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a method of generating a display of privilege state data including capability to read, write, create and delete data for an object stored in a database, classified in Class 707, subclasses 1, 9 and 103.
 - II. Claims 17-24, drawn to a method comprising dependency data and hierarchical relationship particulars as claimed in claims 17-24, classified in Class 345, subclasses 741 and 743.
 - III. Claims 25-27, drawn to a network system including a terminal device and one server particulars as claimed in claims 25-27, classified in Class 709, subclass 203.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it is usable in a method of generating a display of privilege state data including capability to read, write, create and delete data for an object stored in a database classified in Class 707, subclasses 1, 9 and 103 which lacked the dependency data and hierarchical relationship particulars as claimed in claims 17-24, classified in Class 345, subclasses 741 and 743; and further lacked the network system

Art Unit: 2142

including a terminal device and one server particulars as claimed in claims 25-27 classified in Class 709, subclass 203. See MPEP § 806.05(d).

2) Because these inventions are distinct for the reasons given above and because the search required for each group is different and not co-extensive for examination purpose because these groups would require different searches on PTO's classification class and subclass e.g.

a) the Group I search (1-16) would require use of search classified in Class 707, subclasses 1, 9 and 103, (which would not required for the Groups II-III);

b) the Group II search (claims 17-24) would require use of search Class 345, subclasses 741 and 743, (which would not be required for the Groups I and III); and

c) the Group III search (claims 25-27) would require use of search Class 709, subclass 203 (which would not be required for the Groups I-II) therefore restriction for examination purposes as indicated is proper.

3 Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
